

Cinghie Poly-V

Poly-V belts

CINGHIE A STOCK

A stock sono disponibili le cinghie Poly-V per i passi dei rulli più frequenti. La pretensione prevista del 1-3% risulterà effettiva osservando le tolleranze dei passi dei rulli rapportati agli sviluppi corrispondenti.

Il calcolo della trasmissione dipende dalle prestazioni assicurate dal produttore di cinghie e consigliamo eventualmente di contattarci.

AVAILABLE BELTS

We have stock availability for Poly-V for the most usual roller pitches.

The initial tension ranging from 1 to 3% results from the roller pitches and is taken into account in the length of the belt. The tolerances for the hole spacing must be observed.

Consult the belt manufacturer for assistance in calculating the required motor power or eventually contact us.

Cinghie POLY-V flessibili a 2 e 3 coste passo 2,34 - profilo J ISO 9982 DIN 7867
Flexible Poly-V Belts with 2 and 3 ribs pitch 2,34 - J profile ISO 9982 DIN7867
